

AUBOURN WITH HADDINGTON PARISH COUNCIL RISK MANAGEMENT

Risk Status Indications

The adopted risk management methodology uses a traffic light colour against each risk item to confirm its current status.

The coding is defined as follows:

 **G** . This identified risk is being effectively managed with adequate reviews, processes and/or documentation as appropriate.

 **A** *As applicable, either*

This identified risk is being managed. However, there are aspects of risk management, which ought to be improved to achieve a green status. It is recognised that sometimes improvements may be difficult to achieve and remedial work may take time (e.g. a need for Councillor training).

or

This identified risk is not under adequate management. However, if this risk arises, it will have a minimal impact upon the Council. Whilst attempts can be made over time to improve the management of this risk, there may be occasions where the cost of mitigation is not warranted (e.g. holding spare parts or equipment).

 **R** This identified risk, which has a serious potential impact upon the Council is not under adequate management. This represents a key risk, which will be highlighted to meetings of the Council until such time that it is adequately managed or mitigated. Certain key risks with a low probability may be entirely beyond the management control capability of the Council – such risks may retain a red status upon the agreement of Council.
